```java
public static String scrambleWord(String word){
    String word1= "";
    int i=0;
    while(i < word.length() -1){
        if (word.substring(i, i+1). equals("A") &&
        !word.substring(i+1, i+2). equals("A")){
        word1 += word.substring(i+1, i+2) + "A";
        i+=2
    }
    else {
    word1 += word.substring(i, i +1);
        i++;
        }
    }
    
    if(i < word.length())
        word1 += word.substring(i);
    return word1;
    }
}
```
